Good Afternoon, Sonia Baez-Hernandez

We will be placing your comments below in consumer correspondence in Docket Nos 20200053, 20200054, 20200056 and forwarding your comments to the Office of Consumer Assistance and Outreach.

Dear Commissioner,

Energy efficiency programs are fundamental to low income communities to keep the cost of energy affordable. The program must include an educational program, weatherization (lighting, shower heads, faucet aerators, and electronics and heavily on appliances equipment). It will be great to promote solar energy and that saved energy (kilowatts) should be developed into entrepreneur programs for low income communities. To develop programs addressing the need of low-income communities and reduce emission means planning transition toward adaptation to groups that are excluded from the COMPAC.

Best,

Sonia Baez-Hernandez
